

IGORAMA

PREMISE:

*Work as a mad scientist's assistant
to pay off your student debt!*

GENRE:

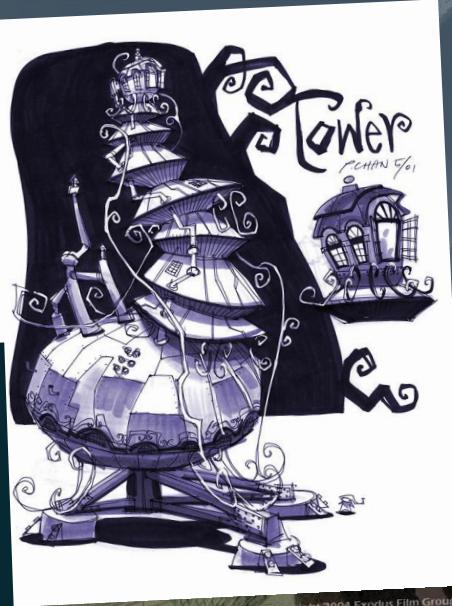

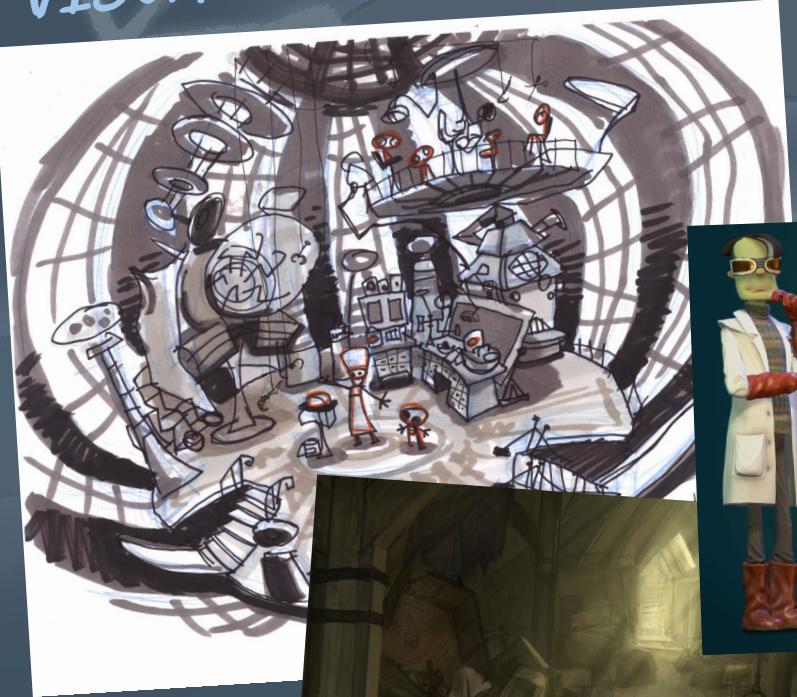

*Mini-game based. Point n' click,
puzzle, platformer...*

OVERVIEW

The game is made up of several mini-games, which are all inspired by tasks an assistant to a mad scientist could have in their job description ("feed the lab rabbits", "test the death ray", "pull the lever", etc.). You should try to do all your tasks to the best of your ability, so that you might get a raise and pay off your student debt faster. The goal of the game is to pay off your debt and find a better job. You lose if you die or get severely injured as a result of your workplace's multiple OSHA violations.

Every day you get a to-do list by your employer, Dr. Dingsbums. Finish all the items on the list to earn your pay and proceed to the next day. Every month(?) you have an opportunity to negotiate your salary (special mini-game). You can also get help and tips from the retired lab rabbit Harrington still living in the tower, if they're feeling generous. You might be able to bribe them with certain items.

VISUAL INSPIRATION

FRITZ HUNDLEY

A recently graduated university student who's now waist-deep in student debt. They are currently working as Dr. Dingsbums' lab assistant for lack of other opportunities. Fritz is a meek and well-meaning person, who does their best in hopes of a raise.

Role in the game: The player character.

DR. GIZMO DINGSBUMS

A mad scientist who has just hired Fritz after his last lab assistant quit. He's eccentric and a bit of a scatterbrain. He dabbles in chemistry, biology and engineering, but his methods can be a bit unethical at times.

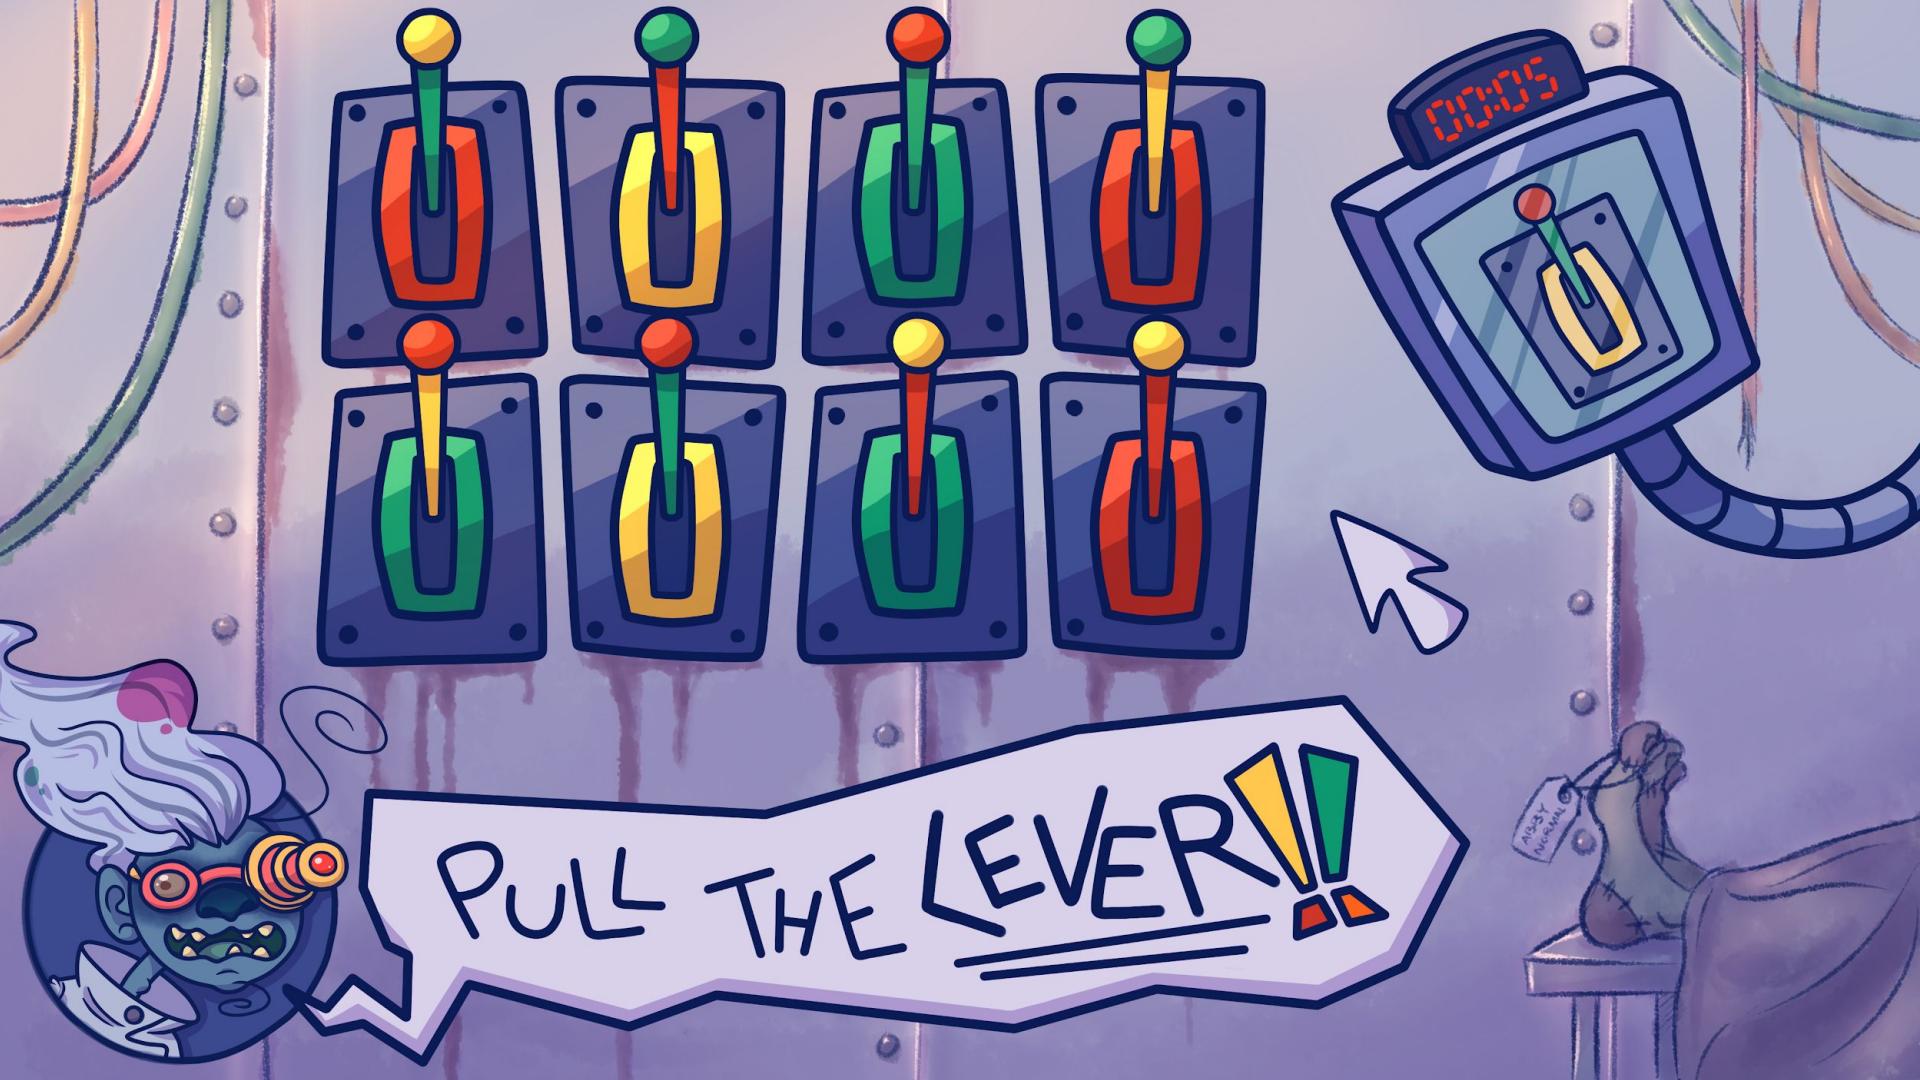

Role in the game: Gives the player tasks.

HARRINGTON

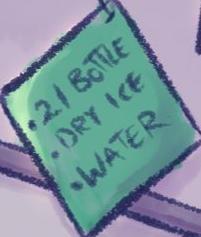

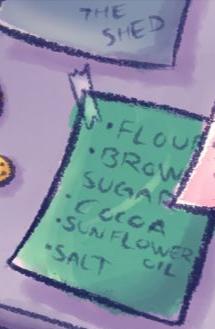

A lab rabbit who's enjoying their early retirement in Dr. Dingsbums' tower. They're very pretentious and expects to be handed everything on a silver platter.

Role in the game: Gives the player (condescending) advice and hints.

PULL THE LEVER!
